February / février

ARTICLES

- C. Rampino, C. Mancuso, and F. Vinale** Laboratory testing on an unsaturated soil: equipment, procedures, and first experimental results 1
- A. Rezzoug, A. Alexis et P. Thomas** Écoulement à surface libre dans un massif de sol soumis à la marée : comparaison théorie-expérimentation 13
- Haluk Akgiin and Jaak J.K. Daemen** Design implications of analytical and laboratory studies of permanent abandonment plugs 21
- Robert P. Chapuis** Borehole variable-head permeability tests in compacted clay liners and covers 39
- M. Hesham El Naggar and Jin Qi Wei** Response of tapered piles subjected to lateral loading 52
- Ellen M. Rathje and Jonathan D. Bray** An examination of simplified earthquake-induced displacement procedures for earth structures 72
- An-Bin Huang, Huai-Houh Hsu, and Jia-Wei Chang** The behavior of a compressible silty fine sand 88
- Debasis Roy, J.M.O. Hughes, and Richard G. (Dick) Campanella** Reliability of self-boring pressuremeter in sand 102
- K.D. Eigenbrod and D. Kaluza** Shallow slope failures in clays as a result of decreased evapotranspiration subsequent to forest clearing 111
- J.F. (Derick) Nixon and Margo Burgess** Norman Wells pipeline settlement and uplift movements 119
- C.D. Martin, P.K. Kaiser, and D.R. McCreath** Hoek-Brown parameters for predicting the depth of brittle failure around tunnels 136

NOTES

- I.H. Wong and T.S. Chua** Ground movements due to pile driving in an excavation in soft soil 152
- M.A. Fam and M.B. Dusseault** Determination of the reactivity of clay-fluid systems using liquid limit data 161
- M.A. Fam and M.B. Dusseault** Effect of unloading duration on unconfined compressive strength 166

DISCUSSIONS

- S. Sivathayalan and Y. Vaid** Ultimate state of reconstituted and intact samples of deltaic sand: Discussion 173
- J.M. Konrad, N. Pouliot, and S. Saint-Laurent** Ultimate state of reconstituted and intact samples of deltaic sand: Reply 176
- Andrew M. Ridley and John B. Burland** Use of the tensile strength of water for the direct measurement of high soil suction: Discussion 178
- Y. Guan and D.G. Fredlund** Use of the tensile strength of water for the direct measurement of high soil suction: Reply 181
- Y.P. Vaid, A. Eliadorani, S. Sivathayalan, and M. Uthayakumar** Quasi-steady state: a real behaviour?: Discussion 182
- Hulming Zhang and Vinod K. Garga** Quasi-steady state: a real behaviour?: Reply 184
- Mitsutoshi Yoshimine** Quasi-steady state: a real behavior?: Discussion 186
- Hulming Zhang and Vinod K. Garga** Quasi-steady state: a real behaviour?: Reply 188
- J. Chu** Quasi-steady state: a real behaviour? Discussion 190
- Hulming Zhang and Vinod K. Garga** Quasi-steady state: a real behaviour?: Reply 192

Instructions to Authors I-1

Recommendations aux auteurs R-1

April / avril

ARTICLES

- John F. Cassidy and Garry C. Rogers** Seismic site response in the greater Vancouver, British Columbia, area: spectral ratios from moderate earthquakes 195
- S.J. Boone, J. Westland, and R. Nusink** Comparative evaluation of building responses to an adjacent braced excavation 210
- O. Hungr, S.G. Evans, and J. Hazzard** Magnitude and frequency of rock falls and rock slides along the main transportation corridors of southwestern British Columbia 224
- E. Eberhardt, D. Stead, and B. Stimpson** Effects of sample disturbance on the stress-induced microfracturing characteristics of brittle rock 239
- Tomoyoshi Nishimura, Yasunari Hirabayashi, Delwyn G. Fredlund, and Julian K.-M. Gan** Influence of stress history on the strength parameters of an unsaturated statically compacted soil 251
- D.A. Walters and R.C.K. Wong** The hydraulic and mechanical response of an oil sand fracture under a varying confining pressure 262
- Amer Ali Al-Rawas and A. McGown** Microstructure of Omani expansive soils 272
- D.S. Kim and H.C. Park** Evaluation of ground densification using spectral analysis of surface waves (SASW) and resonant column (RC) tests 291
- Yi-Chang Tsai and J. David Frost** Using geographic information system and knowledge base system technology for real-time planning of site characterization activities 300
- T.R. Davies and M.J. McSaveney** Runout of dry granular avalanches 313
- Zheng-Han Chen, D.G. Fredlund, and Julian K.-M. Gan** Overall volume change, water volume change, and yield associated with an unsaturated compacted loess 321
- S.G. Fityus, D.W. Smith, and J.R. Booker** Contaminant transport through an unsaturated soil liner beneath a landfill 330

NOTES

- David N. Dewhurst, Joseph A. Cartwright, and Lidia Lonergan** Three-dimensional consolidation of fine-grained sediments 355
- Daud W. Rassam and David J. Williams** A relationship describing the shear strength of unsaturated soils 363
- John P. Sully, Peter K. Robertson, Richard G. Campanella, and David J. Woeller** An approach to evaluation of field CPTU dissipation data in overconsolidated fine-grained soils 369
- Anthony T.C. Goh** Genetic algorithm search for critical slip surface in multiple-wedge stability analysis 382
- A. Sridharan, H.B. Nagaraj, and N. Srinivas** Rapid method of consolidation testing 392

ERRATUM

- Michel Aubertin, Jean-François Ricard, and Robert P. Chapuis** Erratum: A predictive model for the water retention curve: application to tailings from hard-rock mines 401
- Obituary / Nécrologie** iii

June / juin

ARTICLES

- Jean-Marie Konrad** Frost susceptibility related to soil index properties 403
- M. Abdel-Meguid, M.H. El Naggar, and J.Q. Shang** Axial response of piles in electrically treated clay 418
- Robert B. Donahue, S. Lee Barbour, and John V. Headley** Diffusion and adsorption of benzene in Regina clay 430
- C. Hsein Juang, Caroline Jinxia Chen, and Yong-Ming Tien** Appraising cone penetration test based liquefaction resistance evaluation methods: artificial neural network approach 443
- N. Gurung and Y. Iwao** Numerical simulation of pullout response for planar soil reinforcements 455
- P.J. Langhorne, K.J.L. Stone, and C.C. Smith** The bearing capacity of saline ice sheets: centrifugal modelling 467
- J.L. Grozic, P.K. Robertson, and N.R. Morgenstern** The behavior of loose gassy sand 482
- Hiroyuki Tanaka and Jacques Locat** A microstructural investigation of Osaka Bay clay: the impact of microfossils on its mechanical behaviour 493

Guoxi Wu and W.D. Liam Finn Seismic lateral pressures for design of rigid walls	509
Nathalie Guérin, Karam Sab et Pascal Moucheron Identification expérimentale d'une loi de tassement du ballast	523
Michel Massiera, Bernard Boncompain et Joseph Merheb-Harb Interprétation des mesures inclinométriques durant la construction des remblais zonés des ouvrages de retenue du Complexe La Grande, phase I	533

NOTES

K.D. Eigenbrod and W.H. Wurmnest Pore-water pressure response during undrained isotropic load changes in layered soils	544
P.J. Finlay, G.R. Mostyn, and R. Fell Landslide risk assessment: prediction of travel distance	556
D.S. Jeng and Y.S. Lin Pore pressure on a submarine pipeline in a cross-anisotropic nonhomogeneous seabed under water-wave loading	563

DISCUSSIONS

Ashraf M. Ghalay Uplift behaviour of cylindrical anchors in sand: Discussion	573
S.T. Hsu and H.J. Liao Uplift behaviour of cylindrical anchors in sand: Reply	575
J. Chu and W.K. Leong Static liquefaction of very loose sands: Discussion	578
Jerry A. Yamamuro and Poul V. Lade Static liquefaction of very loose sands: Reply	579
Kazuya Yasuhara Behavior of a fine-grained soil during the Loma Prieta earthquake: Discussion	582
Ross W. Boulanger, Lelio H. Mejia, Mark W. Myers, and Izzat M. Idriss Behavior of a fine-grained soil during the Loma Prieta earthquake: Reply	584
